Full job description

Your new company

This role sits within a government organisation with a head office in the heart of Burwood. You will work with one of the leading agencies in government with an excellent reputation in a highly productive team. The organisation is focused on providing sustainable, efficient and cost-effective services.

Your new role

Within this role you will act as a key contributor to the overall technical direction of the team's security capability. The role will work across the Security and Risk team providing specialist advice and skills to ensure the successful implementation, delivery, and continuous improvement of cyber defence, risk and resilience services across the organisation.

What you'll need to succeed

As well as in depth understanding of Cyber security you will be required to possess the following skills/experience:

- Deep knowledge of information security risk management and cyber

security technologies

- Strong experience in implementing security architectures, tools and practices with a working knowledge of OT and IT
- Demonstrated knowledge of ISO27001, ISO31000, IEC 62443, ASD Essential 8, and or NIST Framework
- IT skills, including knowledge of computer networks, protocols, operating systems, software, hardware and security, across enterprise networks and OT environments is desirable
- Experience and certification in cloud technology of AWS and Azure is highly desirable
- Cyber Security related certifications such as CRISC, CISM, TOGAF, SABSA or other relevant certifications is desirable
- Passionate about and interested in the cyber security environment and have a genuine understanding of global standards and best practice

What you'll get in return

You will be rewarded with a 12-month rolling contract in one of the leading government agencies with a very competitive remuneration package and a high possibility of extension.
