Full job description

Your new company

Our Structures Team focusses on the design of structures that deliver our clients' requirements and make a positive difference to the community.

Your new role

You will be working directly with Principals/Project Directors in delivering major projects with a specific focus on expanding your skills and client relationships.

Your new role will include but not limited to:

- Structural design of building projects focused in the commercial, retail, health, and education sectors
- Assist in broader structural engineering including in the transport infrastructure and marine and the opportunity to contribute to projects in other states.
- Maintaining ongoing communication with relevant Project Managers/Team Leaders and clients when required, to ensure effective communications on matters relevant to the project.
- Contributing to the resolution of technical issues on projects and providing technical guidance to other team members.
- Working in collaboration with other design disciplines to ensure the integrity of the overall design;

What you'll need to succeed

Your previous experience in a similar role within this area will lead to your success, as will:

- Relevant industry experience with a proactive approach towards your work.
- Self-motivated, team orientated individual, capable of working effectively in a dynamic environment with a strong focus on professionalism and innovation.
- Strong communication and liaison abilities to engage with clients and other engineers.

- Ability to work accurately and efficiently within a busy client focused team.
- Strong practical understanding, proactive high-level thinking, and high attention to detail.

What you'll get in return

In return for your dedication and hard work you'll be rewarded with:

- Learning and development opportunities with access to training, mentoring and support for career progression.
- A creative and innovative environment with modern tools and technology
- Excellent training, support and global career opportunities

What you need to do now
