### Full job description

#### Your new company

As a market leader in supply chain equipment pooling, you'll be working for a company that is changing the way goods get to market. This company continuously sets the industry standard and provides the latest innovations in reusable supply chain packaging and solutions. Joining this company you will be working on the day shift across multiple sites predominantly in Sydney's West.

#### Your new role

Your role within the company will have you performing preventative and breakdown maintenance across multiple Sydney sites for an industry leader in supply chain services. In addition you will:

- Be directly responsible for the day to day mechanical serviceability of the production line and other areas of the plant to ensure downtime is kept to a minimum
- Participate as required in Projects and Modifications to improve machinery efficiency and reliability, ensuring that all work carried out is safe and considered.
- Effectively working and communicating with Production and other Maintenance team members to ensure plant performance is maximised across all shifts.

#### What you'll need to succeed

To be successful for this role you will have:

- Extensive experience working within a strong and systems-based safety culture.
- Australian recognized trade qualification
- Understanding of mechanical fault finding and repair within a production environment
- A thorough understanding of the principals of mechanical, pneumatic and hydraulic systems and associated production line equipment and plant is highly desirable

- Be competent and skilled in all forms of welding (MIG, electric arc and oxy/acetylene) and fabrication techniques in support of production line maintenance.
- Be competent in the use and operation of all workshop tools and equipment including but not limited to lathes, milling machines, grinders etc.
- Positive, constructive attitude, a strong focus on preparation and planning and a mindset geared towards effective utilisation of every second to ensure maximum plant uptime.

**What you'll get in return**

You will be rewarded with:

- A very competitive hourly rate
- A vehicle allowance for work use between sites
- A supportive learning and development culture with award winning engagement.
