Full job description

Your new company

Your new company based in Melbourne's East are a global supplier of engineered solutions to a large client base being predominantly blue-chip companies. Your new company designs and manufactures innovative equipment with varied specifications.

Seen as elite in what they do and holding their work to an extremely high standard – you will benefit from working alongside a company with high standards, well renowned in the engineering field and an abundance of growth still to come.

Your new role

- Your new role will see you programming and operating CNC Milling machines and reporting to the Production Manager
- Experience working in the automotive or aerospace manufacturing field will be highly regarded. General engineering-based company experience will also be advantageous

What you'll need to succeed

- Trade qualified fitter & turner, with experience
- Competent in manually writing basic CNC programs & understand G code
- Jobbing experience
- Be able to read and understand engineering drawings
- Have an understanding of modern machining methods and tooling
- Computer literate – word, excel etc.
- CAM machining experience advantageous
- Crane awareness, and forklift experience will also be highly regarded

What you'll get in return
